Summary

Passionate programmer eager to kickstart a tech career by building innovative solutions, sharpening development skills, and contributing to impactful projects in a dynamic work environment.

Education

UNITED UNIVERSITY **2024 – 2026**
Master of computer Application | **CGPA: 8.37**

UNITED UNIVERSITY **2021 – 2024**
Bachelor of computer Application | **CGPA: 7.77**

SD Public School, Jaunpur
Class XII (Intermediate) | **65.6%** **2021**
Class X (Matriculation) | **81.3%** **2019**

Experience

Frontend developer Jan 2026 – June 2026
ProdeskIT Remote

- Worked as a Frontend Developer Intern at ProDeskIT, building modern and responsive web applications using React.js and Next.js for projects including an eCommerce platform, Educore online study platform, and an AI-powered cover letter generator.
- Developed reusable UI components with Tailwind CSS and Shadcn UI, focusing on clean design, responsiveness, performance optimization, and seamless user experience across multiple projects.
-

Projects

EduCore –A Online learning platform with AI | |

- Architected and developed Educore, a full-featured online learning platform using Next.js and Redux, enabling students to access educational content, interactive dashboards, and seamless course management through a modern and scalable web experience.
- Integrated Firebase authentication and real-time APIs while leveraging Gemini AI features to enhance user interaction, automate learning assistance, and deliver dynamic educational functionalities across the platform.
- Engineered a responsive and high-performance frontend using Tailwind CSS and reusable component architecture, optimizing state management, API handling, and overall user experience for a production-ready application.

Sigma-Store – E-Commerce Platform | |

- Developed the frontend of Sigma-Store, a modern eCommerce web application using React.js, creating responsive product pages, dynamic product listings, and seamless shopping experiences with clean and scalable UI architecture.
- Integrated external APIs using Axios for real-time product data fetching, implementing efficient product rendering, category filtering, and smooth user interactions across the application.
- Engineered a responsive and visually polished interface with Tailwind CSS, optimizing component reusability, frontend performance, and overall user experience across desktop and mobile devices.

Github-API-HUNTER – Github data fetching platform | |

Developed a GitHub API Hunter platform using React.js, enabling users to search and explore detailed GitHub profiles, repositories, followers, and contribution-related information through a clean and interactive interface.

Integrated GitHub APIs using Axios for real-time data fetching and implemented core React concepts including component-based architecture, props, hooks, conditional rendering, and efficient state management for dynamic user experiences.

Engineered a fully responsive frontend with Tailwind CSS, focusing on reusable UI components, optimized API handling, and smooth performance across desktop and mobile devices.

Skills

Programming Languages: Java, JavaScript (ES6+), TypeScript,
Full Stack: MERN Stack, Next.js 15, React.js, Node.js, Express.js,HTML, CSS
Databases: MongoDB, Firebase, MySQL
Frameworks & Tools: Material UI, Git, Postman, Vercel, Linux
Soft Skills: Leadership, Team Collaboration, Problem Solving, Strategic Planning
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks , OOP

Certifications Achievements

Ethical Hacking : Completed an Ethical Hacking certification course from Udemy on April 28, 2026, gaining hands-on experience in penetration testing, vulnerability assessment, network security, and cybersecurity fundamentals using industry-standard tools including Nmap, Wireshark, Metasploit, Burp Suite, SQLMap, and Kali Linux.
